Chefstone Rotating Ice Display, Lighted, Round, 30 in.
Rotating Lighted Ice Carving Displays

Chefstone fiberglass reinforced base with fluorescent lighting. Ice display holds up to 500 lb. ice block or carving. Slowly rotates 360°. Built in drain ice melt water drain tube, motor driven, clear acrylic rotating platter with stainless steel pegs to secure ice.

Available in all international voltages.

Brilliant lighting in the display base illuminates ice sculptures creating a stunning glowing ice centerpiece.

Chefstone rotating lighted ice carving displays add a new dimension of light, color and movement to ice sculptures and food display.

Includes motorized, fluorescent lighted base with acrylic ice platter and ice melt drain.

Available in Chefstone colors: Black Diamond, Gibraltar, Sandstone

Size: 29x29x9 in.
